UL 508A & UL 698A Certified Control Panels
# Built for Reliable, Code-Ready Installations

UL 508A Industrial Control Panels | UL 698A Intrinsically Safe / Hazardous Location Panels

Wheeler Electric's **UL certified control panels** are a solid choice when you're prioritizing safety, reliability, and long-term performance. UL certification supports compliance with rigorous standards. Minimizing risks like electrical shocks, fires or equipment failures. This translates to fewer disruptions, lower repair cost, and a smoother approval process for installations, saving you time and money.

Now offering UL 698A capability for projects that require **intrinsically safe circuits and hazardous location interface** considerations. If your facility includes classified areas or ignition-risk environments our shop can support those requirements. Helping streamline inspections and keep commissioning on schedule.
